

Sheet1

TF	An algorithm must be unambiguous.	TRUE		
MA	To represent an algorithm, you must have all of the following? Select all that apply.	collection of primitives	correct	ambiguous or
MA	Select all the properties that are true about pseudo-code.	Pseudo-code is the same as an algorithm	incorrect	Pseudo-code
ORD	What are the proper steps order to problem solving?	Understand	Devise	Carry Out
TF	A good problem solver will recognize a task or subtask tha has been solved before and try to re-create the solution.	FALSE		
MC	What is the method called that allows you to break up large problems into smaller units?	separate and solve	incorrect	divide and cor
TF	In a repeated execution, you only repeat as long as condition is true.	TRUE	incorrect	Step-by-step

Sheet1

incorrect	well defined pimitives	correct	must be written on paper Pseudo-code	incorrect	primitives must be short	incorrect
correct	Pseudo-code must be clear and consistent	correct	should be programming language dependent	incorrect	Pseudo-code needs to be short	

Evaluate

correct	divide and solve	incorrect	cut and conquer	incorrect
