

ADDING COLLABORATORS

Step 1 Go to your existing repo in Git

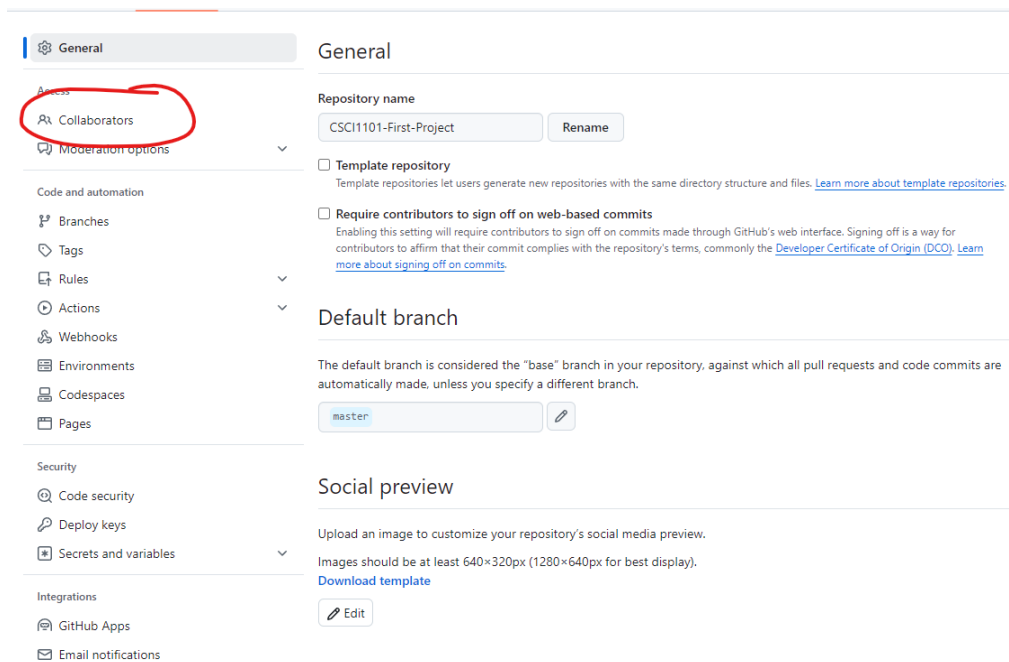

Step 2 Click Settings

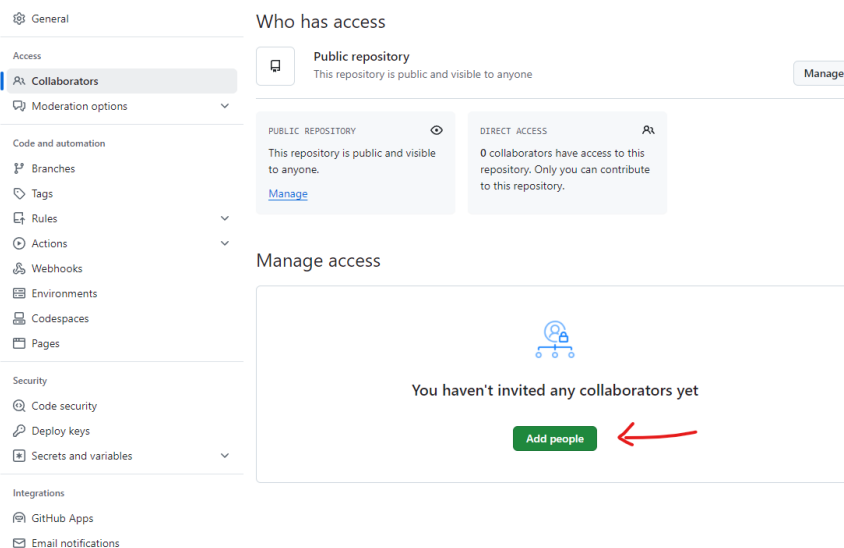

The screenshot shows the GitHub interface for a repository named "CSCI1101-First-Project". The repository is public and has 1 branch (master) and 0 tags. The "Settings" link in the top navigation bar is circled in red, and a red arrow points to it. Below the repository name, there is a table of files and their commit history. The files listed are .gitattributes, .gitignore, CSCI1101-First-Project.sln, CSCI1101-First-Project.vcxproj, CSCI1101-First-Project.vcxproj.filters, README.md, and main.cpp. The commit history shows that the first six files were added 5 days ago, and the last file, main.cpp, was added 1 hour ago. Below the file list, there is a section for the README file, which is currently empty.

File	Commit Message	Commit Hash	Time Ago
.gitattributes	Add .gitattributes, .gitignore, and README.md.	a4782e1	5 days ago
.gitignore	Add .gitattributes, .gitignore, and README.md.		5 days ago
CSCI1101-First-Project.sln	Add project files.		5 days ago
CSCI1101-First-Project.vcxproj	Add project files.		5 days ago
CSCI1101-First-Project.vcxproj.filters	Add project files.		5 days ago
README.md	Add .gitattributes, .gitignore, and README.md.		5 days ago
main.cpp	Added an output manipulator		1 hour ago

Step 3. Click Collaborators

Step 4. Click the green “Add people” button

Step 5. Use the search tool to find your collaborators by GitHub's username, full name, or email.

Add a collaborator to CSCI1101-First-Project

Search by username, full name, or email

Select a collaborator above

Step 6. If found, add that collaborator to your repo. If not found, confirm the person's GitHub username, and/or email. If unsuccessful, contact GitHub support.

Step 7. If a collaborator was successfully added, an email with an invitation is on the way. Ask your collaborator to check their email and accept your invitation.
