

This is how Virtual
Memory works

Virtual Memory

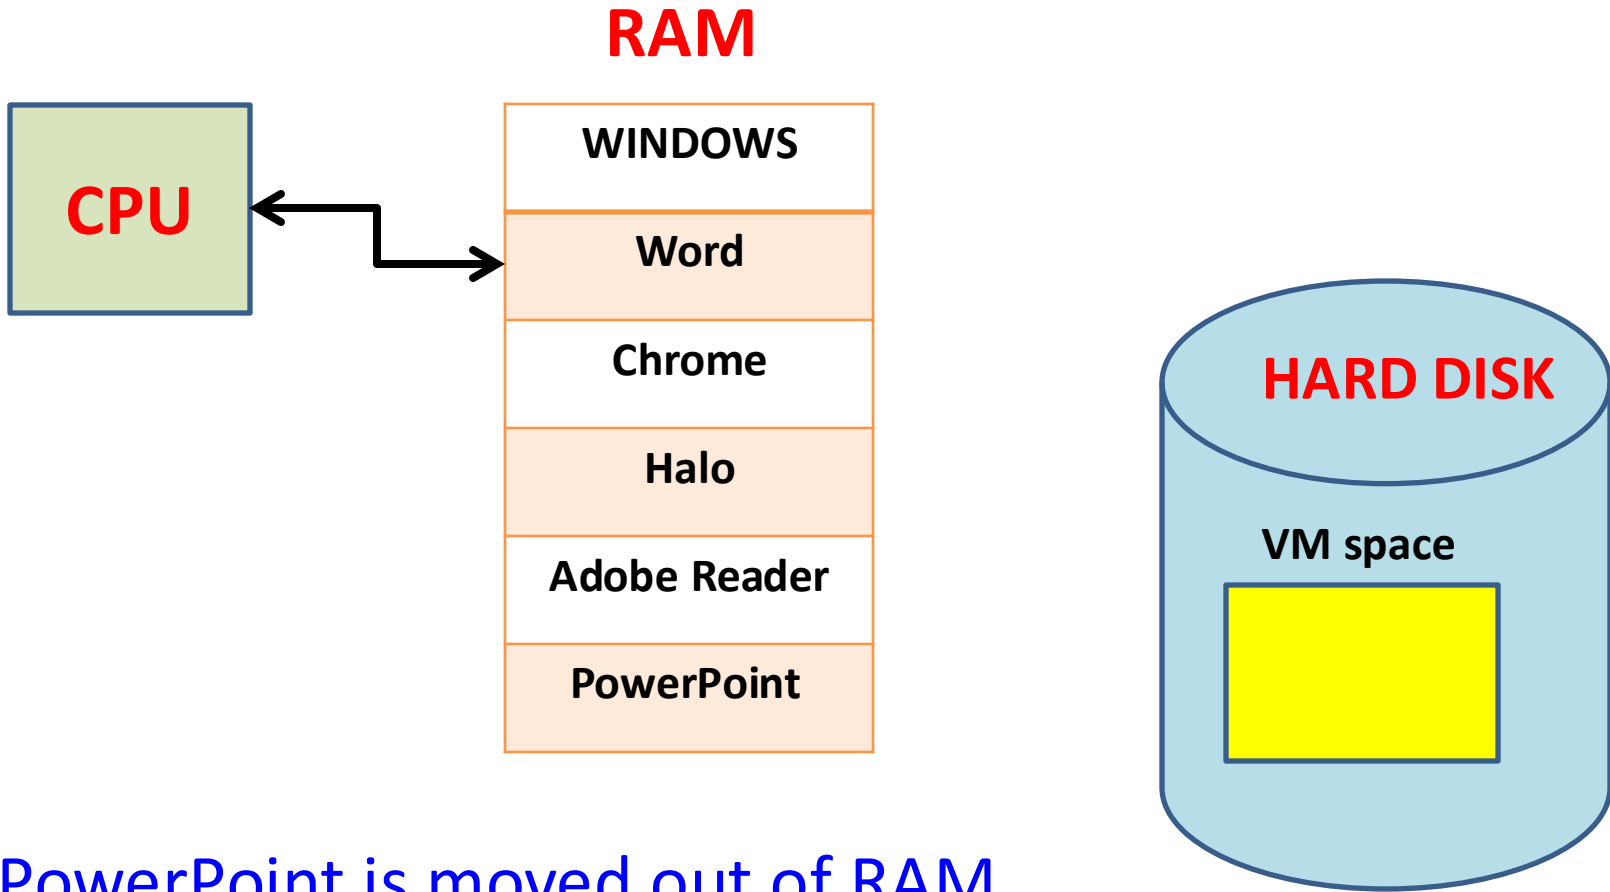

Virtual Memory

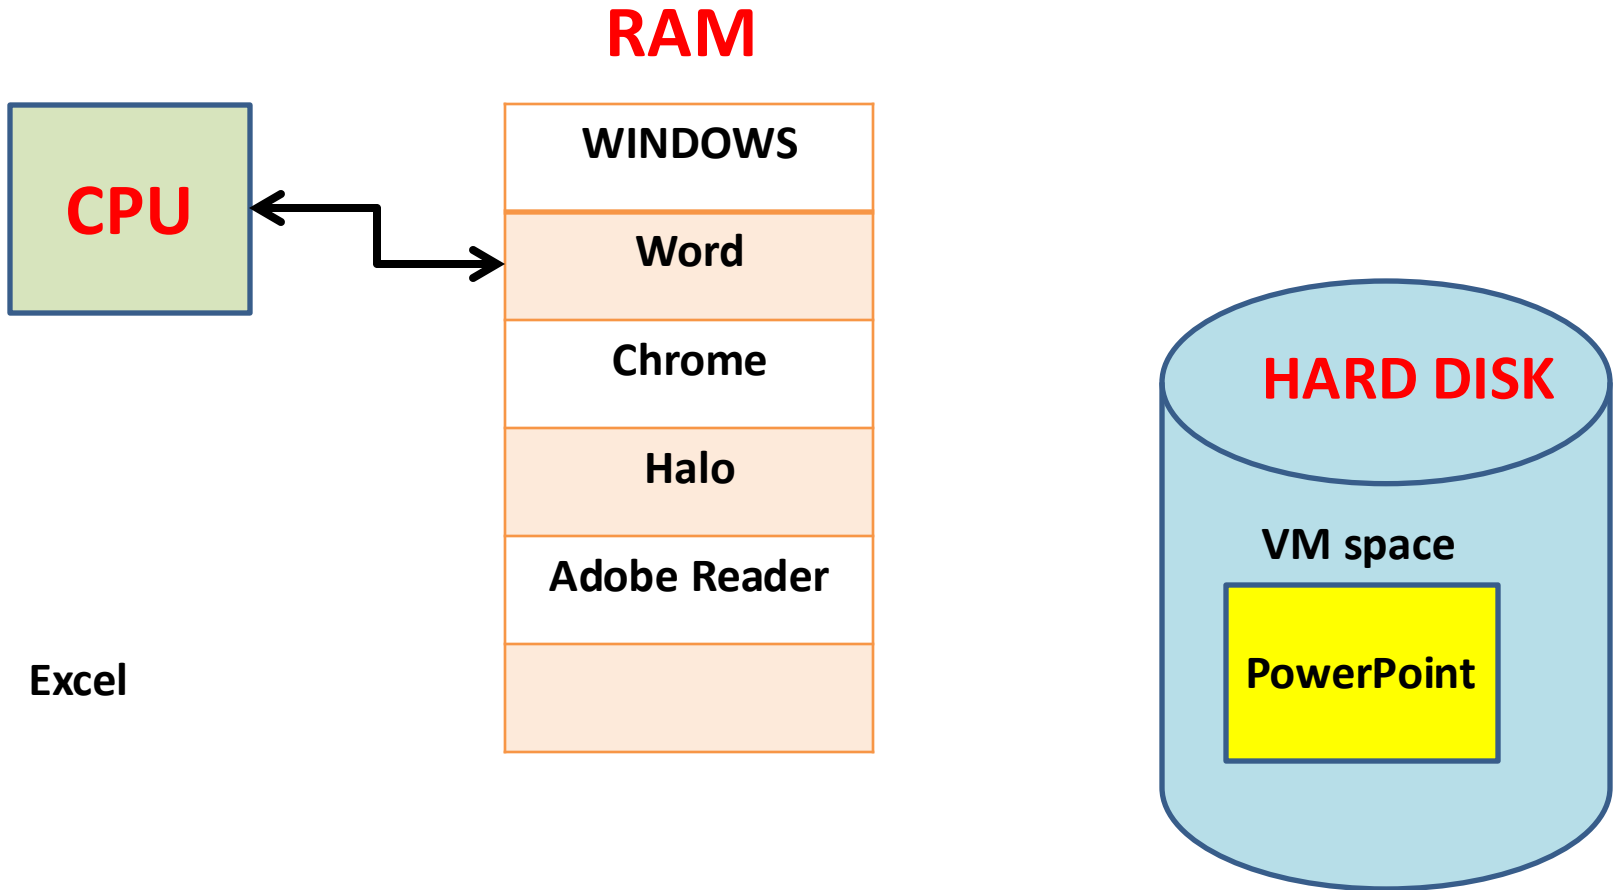

Now it needs to execute
Excel but there is no
available space on RAM.

Virtual Memory

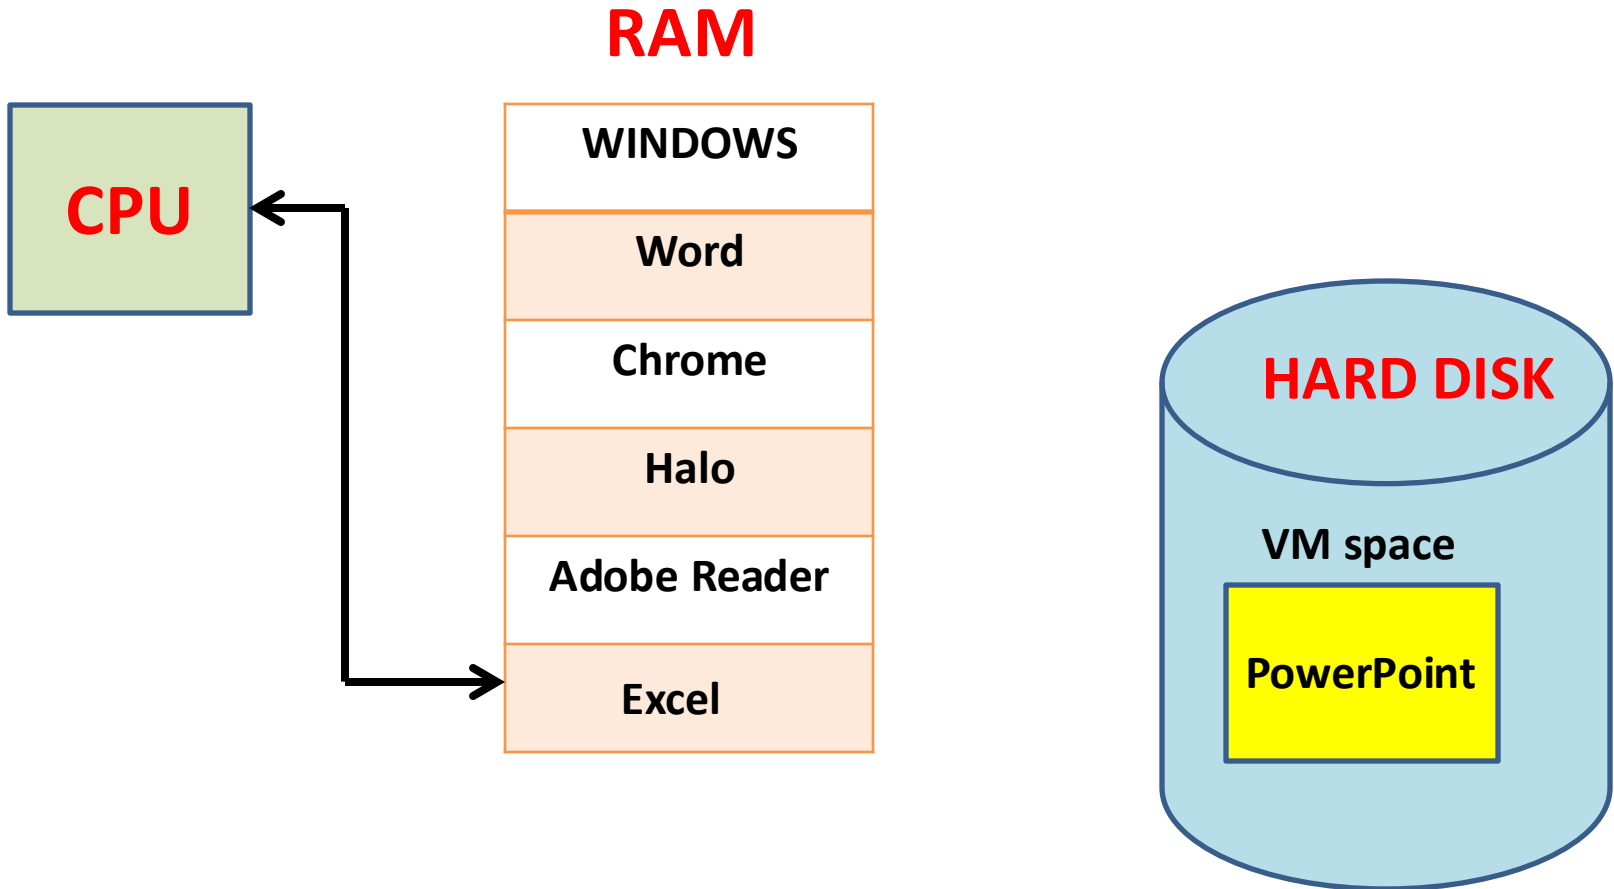

PowerPoint is moved out of RAM onto the hard disk's VM space to open room for Excel.

Virtual Memory

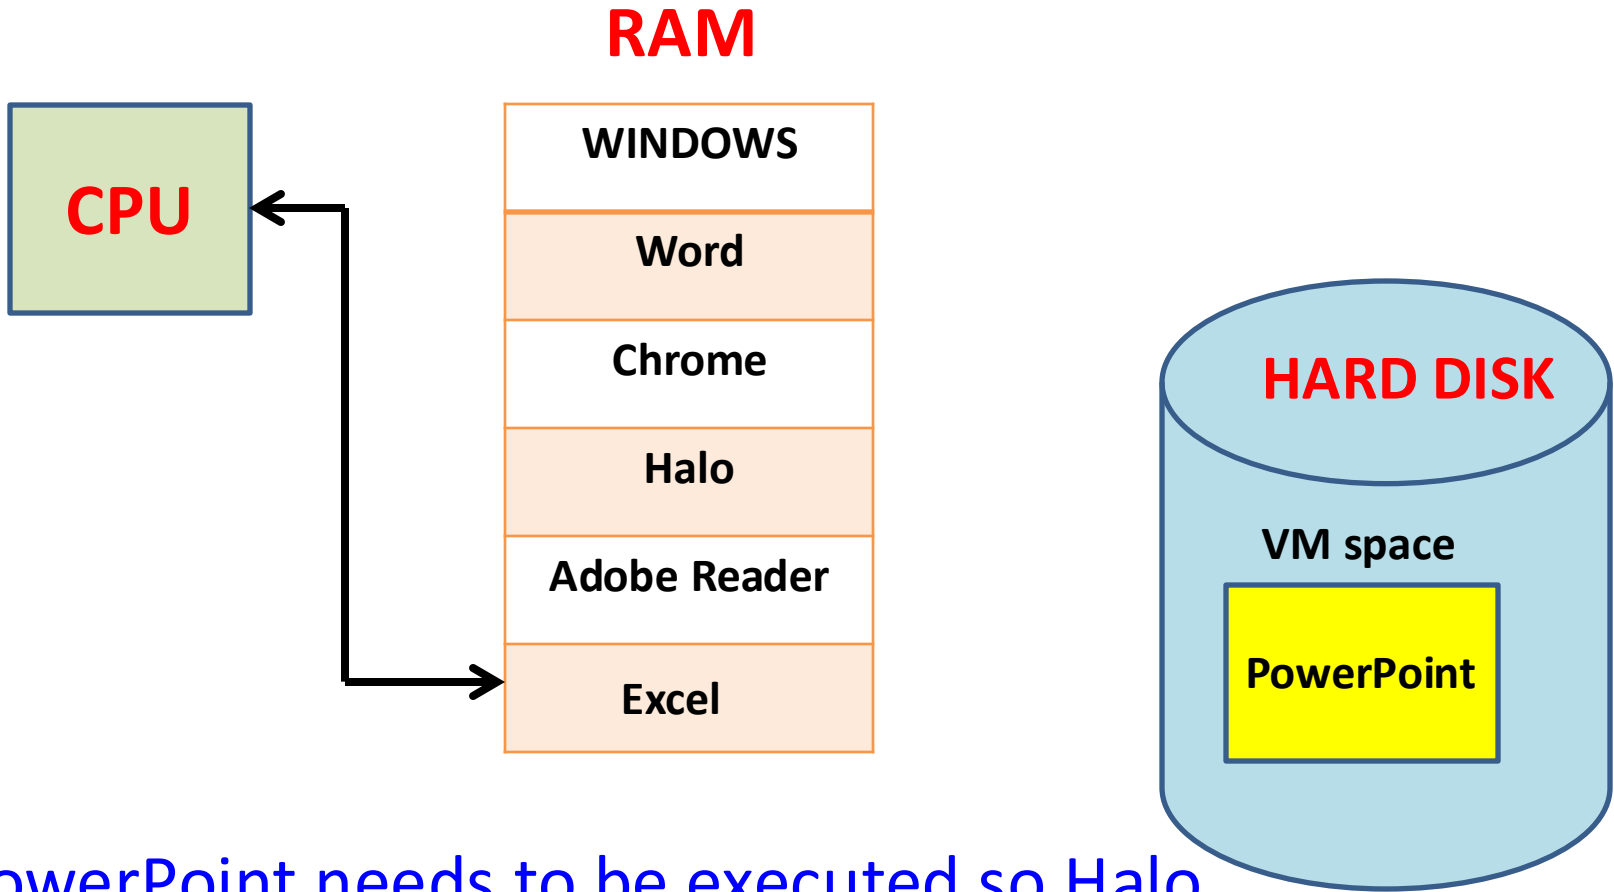

Excel is moved onto RAM.

Virtual Memory

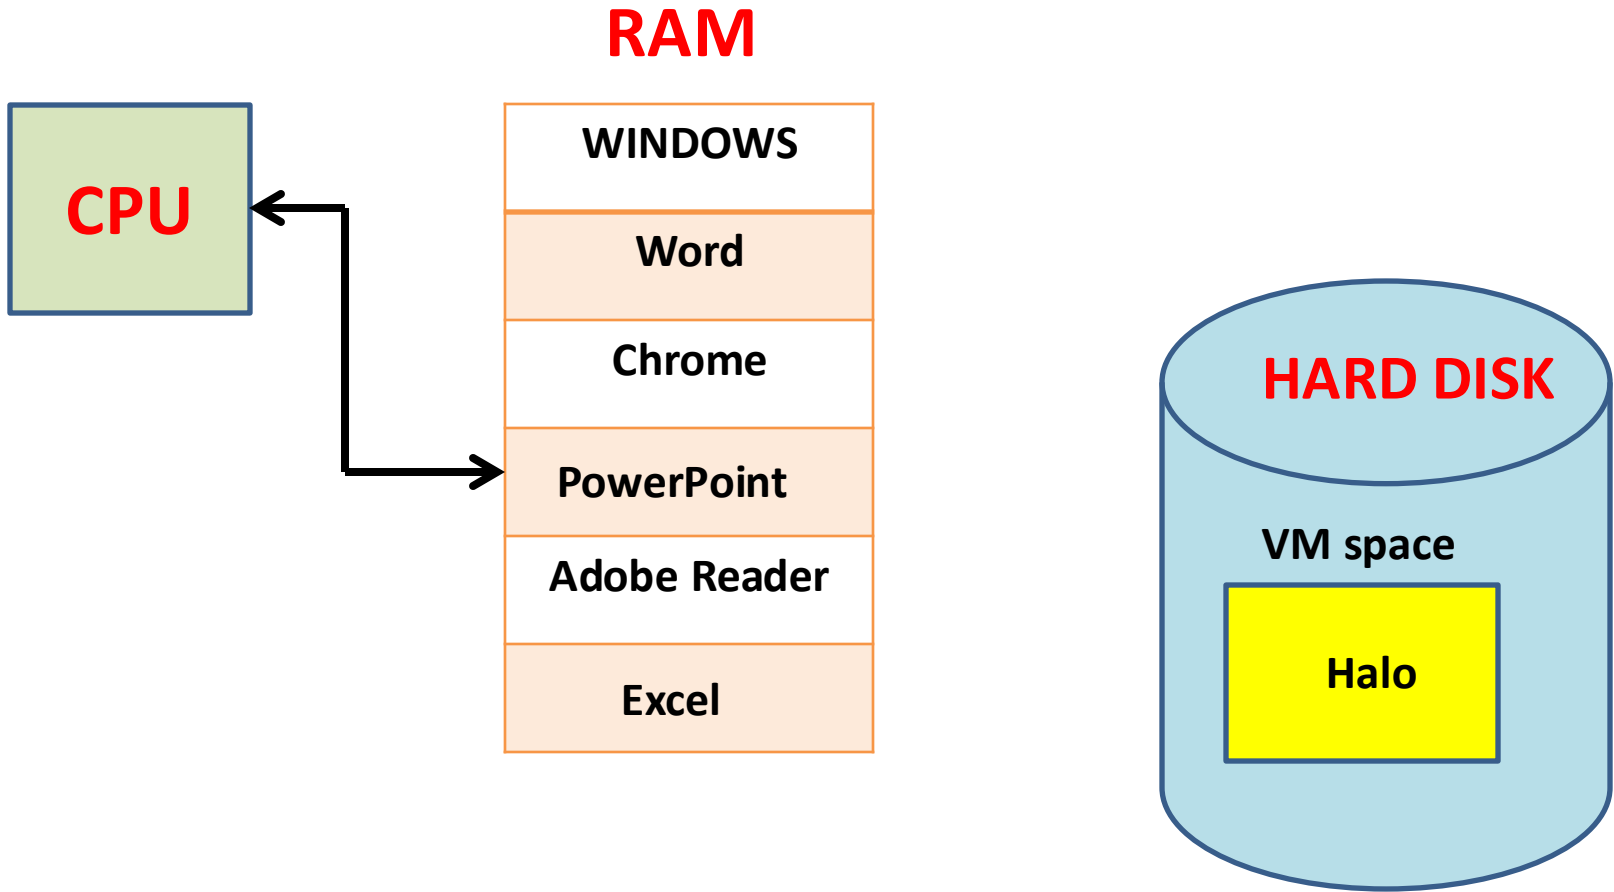

The CPU can execute Excel now.

Virtual Memory

PowerPoint needs to be executed so Halo is sent to the hard disk and PowerPoint is brought back onto memory.

Virtual Memory

The CPU can execute PowerPoint now.
