

CAREERS IN COMPUTER SCIENCE

CSCI 1101 Introduction to Computer Science

CAREER OPTIONS IN CS

- There are many career options available to computer scientists and they aren't always in software companies such as Twitter(X), Facebook, or Google.
- Examples of non-software companies:
 - Amazon
 - Space X
 - Caterpillar Inc.
 - General Motors
 - Bank of America

CAREERS IN CS

- Software Developer
- Software Engineer
- Web Developer
- Game Developer
- UI/UX Design
- IT
- Security Analyst
- Database Engineer
- AI Developer
- **And many more**

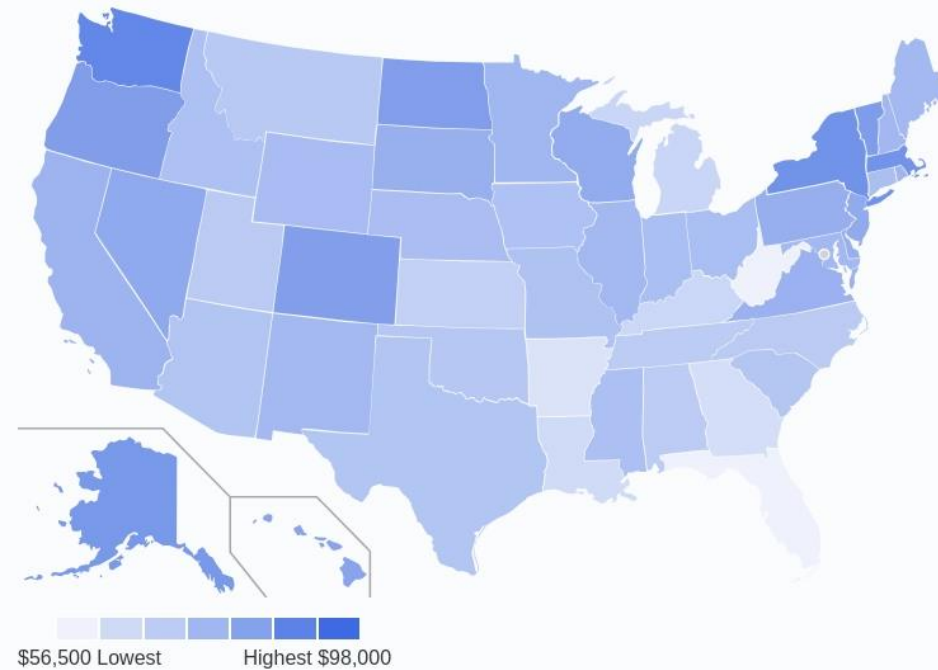

SALARIES FOR CS MAJORS

- <https://www.ziprecruiter.com/Salaries/Computer-Science-Degree-Salary>

Computer Science Degree Salary in the United States

	Annual Salary	Monthly Pay	Weekly Pay	Hourly Wage
Top Earners	\$97,500	\$8,125	\$1,875	\$46
75th Percentile	\$93,500	\$7,791	\$1,798	\$45
Average	\$83,109	\$6,925	\$1,598	\$40
25th Percentile	\$77,500	\$6,458	\$1,490	\$37

ZipRecruiter salary estimates, histograms, trends and comparisons are derived from both employer job postings and third party data sources.

SOFTWARE DEVELOPER V. ENGINEER

- Software developers design specific computer systems and application software. Software engineers work on a larger scale to design, develop, and test entire computer systems and application software for a company or organization
- Software development is a subset of software engineering.

UI/UX DESIGNER

- **User experience (UX)** refers to the user's journey when interacting with a product or service. UX design is the process of creating products or services that provide meaningful experiences for users.
- **User Interface (UI)** design refers to the interfaces with which users engage. The UI design process may include buttons or widgets, text, images, sliders, and other interactive elements.

WEB DEVELOPER

- Web developers usually fall under one of three categories: **back-end** developers, **front-end** developers, and **full-stack** developers. Some web developers also work as webmasters.

GAME DEVELOPER

- Game developers typically play a role in several elements of game development, including **visuals**, artificial intelligence (**AI**), **UI**, and **game logic**. Game developers take the game designers' designs, storyboards, and ideas and use them as blueprints to bring the game to life as something gamers can actually play.

DATABASE ENGINEER

- Database engineers **design and maintain** databases, **increase data storage** capacity, and **troubleshoot** database functionality issues. They also review database performance and user reports.

SECURITY ANALYST

- **Security analysts** identify and correct flaws in the company's security systems, solutions, and programs while recommending specific measures that can improve the company's overall security posture.

CAREER IN RESEARCH

- **Machine Learning:** <https://miutrgv.github.io/>
- **Bioinformatics:**

- **Robotics:** <https://sites.google.com/view/qilu/>

KAHOOT TIME!!!

A low-angle, upward-looking shot of several modern skyscrapers. The buildings are covered in glass and steel, with some featuring unique architectural details like zigzag patterns. The entire image is overlaid with a semi-transparent teal color. In the center, the words "THANK YOU" are written in a large, white, sans-serif font. Below the text, there is a short, horizontal orange line.

THANK YOU
