

Resume 101

Tips on how to format your resume!

How the hiring process works

Apply

Review

Assess

Interview

Offer

Resume should

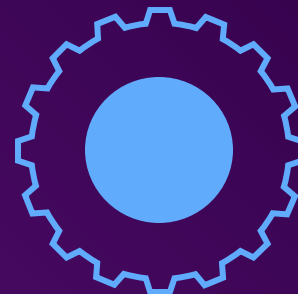

Be short and
straightforward

Use simple and
consistent designs

Highlight the benefits
you can bring to a
company

Showcase your relevant
experience that aligns with
the job you're applying for

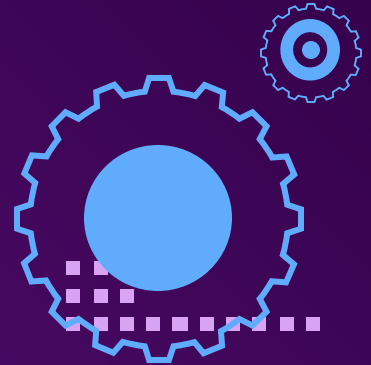

Resume should **not**

Be longer than 1
page

List your
responsibilities

Tell your entire life
story

Be challenging to
navigate/read

Education

University of Texas Rio Grande Valley Expected graduation: MM/YYYY
Bachelor of Science in Computer Science

Skills

Technical Skills: Python, TensorFlow, Swift, Kotlin, C++, JavaScript, Figma

Interdisciplinary: Public speaking, project management, and leadership

WORK EXPERIENCE

What
you did.

Why
you did it?

What
impact you made?

WORK EXPERIENCE

Generic Descriptions:

- You don't want to do this when describing your experience:

"Worked on both Front-end and Back-end development"

WORK EXPERIENCE

Detailed Description:

- This is how you should be explaining your experiences within short bullet points:

“Built and optimized responsive web interfaces with HTML, CSS, and JavaScript, boosting page speed by 30% and improving user engagement.”

No industry experience?

That's okay, we have all been there before.

- As you start your college experience or your Computer science career, you can add as you go.
- Anything from volunteering to retail experience can be used.

Retail experience (examples)

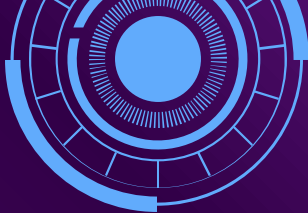

**Communication
Skills**

**Time
management**

**Customer
Service**

**Project
management**
